Title : MetaFrame Presentation Server withFeature Release 3 Deployment and Support

Version : DEMO

1.Which of the following is installed as part of the ICA client software?

A. Citrix Secure ICA

B. Citrix Remote Client Manager

C. Citrix Installation Manager

D. Citrix Remote Application Manager

Answer: D

2 .Certpaper.com has just implemented a MetaFrame for UNIX server farm. The new VP of Operation is taking a crash course in MetaFrame technology and asks. "What is the difference between a published application and server connection?" which answer is correct?

A. Having a published application enables applications to run on any of the configured Citrix severs in the server farm. A server connection can start an application or a server desktop on a specific server.

B. Having a published application means that the application will only run on a specified machine. A server application means that it can run from any machine in the server farm.

C. There is no difference.

D. Published applications cannot be load balanced, but a server application can.

Answer: A

3 .Which of the following does the ICA Passthrough not support?

A. COM port mapping

B. Clipboard mapping

C. Client drive mapping

D. Printer queue mapping

Answer: A

4 .The Enable Sound field in the ICA client is not supported with session connected to a MetaFrame for UNIX serve.

A. True

B. False

Answer: A

5 .What method for conducting scalability test iterations provides the most valid results?

A. 1. Monitor server for 10 minutes with no users

2. Add users until the server fails

B. 1. Monitor sever for 10 minutes with no users

2. Add a single user

3. Wait until the login process is complete

4. Repeat steps 2 and 3 until the server fails

C. 1. Monitor server for 10 minutes with no users

2. Add 5 users

3. Wait 10 minutes

4. Repeat steps 2 and 3 until the server fails

D. 1. Monitor server for 10 minutes with no users.

2. Add a single user

3. Wait 10 minutes

4. Repeat step 2 and 3 until the server fails

Answer: C

6 .The ICA Client for 16-bit DOS works with version 3.3 or greater and supports DOS full screen mode.

A. True

B. False

Answer: A

7. Which of the following describes the ReadyConnect client?

A. The ready Connect client creates the installation disks that are reconfigured with servers telephone number, server names and connection options.

B. The ReadyConnect client create the installation disks that are reconfigured with the server's telephone number, network addresses and connection options.

C. The ReadyConnect client create the installation disks that are reconfigured with the server's telephone number, network address, server name and connection options.

D. The ReadyConnect client create the installation disks that are reconfigured with the server's telephone number, network addresses, server names, connection options and Secure ICA client information.

Answer: C

8 .How are pooled licenses distributed?

A. Pooled licenses are distributed based on the client versions.

B. Pooled licenses are distributed based on the number of logons.

C. Pooled licenses are distributed based on the inherit pool license command on the MetaFrame server.

D. Pooled licenses are distributed based on the number of physical devices accessing resources on the subnet.

Answer: D

9 .When bitmap caching is used in a low-bandwidth network, what occurs? A. There is no effect on the limited bandwidth connection.

B. Performance on the limited bandwidth network connection decrease.

C. Performance on the limited bandwidth network connection increases.

D. If the server is compressing data, the network connection decreases.

Answer: C

10 .The employees at Certpaper.com use computers with the following operating systems: Son Solaris 2.51, WIN 3.1 and DOS. MetaFrame is installed on all of the servers. You want to install the ICA client software on all of the computers. Which ICA client software will you need?

A. UNIX, Win 16 and DOS.

B. DOS, Win 16 and Win 32.

C. Win16, Win32 and UNIX

D. Macintosh, Win32 and UNIX.

Answer: A

11 .What is the primary objective for configuring SQL server replication of the data store?

A. Performance

B. Administration

C. Fault tolerance

D. Disaster recovery

Answer: A

12 .Using Transparent Static Port Mapping, which clients cannot access a subnet? (Choose two.)

A. Web

B. UNIX

C. Win 16

D. WIN 32

E. Macintosh

Answer: A,E

13 .Which command allows you to connect to a disconnected ICA session?

A. ctxconnect

B. ctxqserver

C. ctxinstall

D. ctxqclient

Answer: A

14 .Which command is used to add serial numbers to he license store?

A. clicense add

B. ctxlicense add

C. xplicense install

D. xpinstall license

Answer: A

15 .Citrix Program Neighborhood works with the ICA Client for UNIX.

A. True

B. False

Answer: B

16 .The MetaFrame for UNIX server allows asyne connections.

A. True

B. False

Answer: B

17 .Which three sections are included during the update of an answer file of a MetaFrame XP Presentation Server? (Choose three.)

A. [MSDE Settings]

B. [Citrix XML Service]

C. [Feature Relcase 3]

D. [MetaFrame License Agreement]

E. [Published Application]

Answer: A,B,D

18 .MetaFrame for UNIX only supports the TCP\IP and IPX\SPX protocols.

A. True

B. False

Answer: B

19 .Citrix licenses require an activation code.

A. True

B. False

Answer: A

20 .An administrator is tasked with deploying 10 MetaFrame XP Presentation Servers at the corporate office site. Based on the analysis and design performed by the IT consulting firm, he has decided to use an unattended installation to install his MetaFrame XP Presentation Servers. Which three options are sections that require answers during the configuration of the answer file? (Choose three.)

A. [Citrix IMA Settings]

B. [Citrix XML Service]

C. [Shadowing Restrictions]

D. [Indirect Connection Settings]

E. [Program Neighborhood Settings]

Answer: B,C,D
