Title : Implementing Cisco Secure
Mobility Solutions

Version : DEMO

1.A customer has two ASAs configured in high availability and is experiencing connection drops that require re-establishment each time failover occurs.

Which type of failover has been implemented?

- A. Stateless
- B. routed
- C. trans parent
- D. stateful

Answer: D

2.In a new DMVPN deployment, phase 1 completes successfully. However, phase2 experiences issues. Which troubleshooting step is valid in this situation?

- A. Temporarily remove encryption to check if the GRE tunnel is working.
- B. Verify IP routing between the external IPs of the two peers is correct.
- C. Remove NHRP configuration and reset the tunnels.
- D. Ensure that the nodes use the same authentication method.

Answer: A

3.An engineer is configuring clientless SSL VPN. The finance department has a database server that only they should access, but the sales department can currently access it. The finance and the sales departments are configured as separate group-policies.

Which option must be added to the configuration to make sure the users in the sales department cannot access the finance department server?

- A. Web type ACL
- B. Port forwarding
- C. Tunnel group lock
- D. VPN filter ACL

Answer: C

4.Refer to the Exhibit:

Which result of this command is true?

- A. It displays the RSA public keys of the router
- B. Makes the router generate a certificate signing request
- C. It Specifies self-signed enrollment for a trust point
- D. Generates an RSA key called TRIAL FOUR

Answer: C

5.Refer to the Exhibit:

```
ASA#show crypto ikev1 sa
Active SA: 1
Rekey SA: 0 (A tunnel will report 1 Active and 1 Rekey SA during rekey)
Total IKE SA: 1

1          IKE Peer: 209.165.200.225
           Type : L2L
           Rekey : no
                                   Role : initiator
                                   State : MM_ACTIVE
```

Users at each end of this VPN tunnel cannot communicate with each other.

Which cause of this behavior is true?

- A. The Diffie-Hellman groups configured are different
- B. The pre shared key does not match.
- C. Phase 1 is not completed and troubleshooting is required.
- D. The issue occurs in phase 2 of the tunnel.

Answer: C
