Exam : 646-056

**Title : Advanced Routing and
Switching Life Cycle
Services (LCSARS)**

Version : DEMO

1.Which two tasks are conducted as part of the Migration Plan Development service component? (Choose two.)

- A.Review high-level description of the design requirements, capabilities, features, and functionality of the existing and proposed infrastructure solution.
- B.Analyze the business requirements to identify and align with technology and service requirements.
- C.Identify network services to be migrated.
- D.Define test scripts, use cases and scenarios that validate both operations and network management and security configurations.

Correct:A C

2.Which two documents should be part of the Staging Plan Development? (Choose two.)

- A.site requirements specification
- B.staging project plan
- C.bill of materials
- D.low-level design template

Correct:A B

3.In the design phase, which two tasks are conducted as part of the produce business readiness test plan activity? (Choose two.)

- A.Review the Network Implementation Plan, Low-Level Design, and Network Management System Design.
- B.Finalize Operations and Network Management Design and Test Requirements Document Containing Specific Tests.
- C.Verify Service Level Agreements.
- D.Identify Implementation Risks.

Correct:A B

4.Which activity is performed to discuss the network implementation strategy with key stakeholders and business owners?

- A.System Acceptance Testing
- B.Presentation of Staging Plan
- C.Conduct an On-site Discovery Workshop
- D.Business Readiness Plan Development

Correct:C

5.Which service component within the prepare phase prescribes a set of activities and tasks to help identify and qualify an account for a customer opportunity?

- A.Account Planning
- B.Account Qualification
- C.Business Requirements Development
- D.High-Level Design Development
- E.Technology Strategy Development

Correct:B

6.In testing for business readiness, what are three ways that success criteria should be classified? (Choose three.)

- A.success with needed corrective actions
- B.partial success pending next phase
- C.complete success

D.failure

Correct:A C D

7.What should technical requirements and design goals be combined to create?

- A.Detailed Design Validation
- B.Low-Level Design
- C.Service Level Criteria
- D.Systems Acceptance Test Plan

Correct:B

8.Which task is conducted during the develop the systems acceptance test plan activity?

- A.network resilience tests
- B.compare test parameters against service level requirements
- C.create logical topology diagrams
- D.turn-up and commission tests

Correct:B

9.Which service component within the prepare phase includes a set of activities and tasks to help plan an account for a customer opportunity?

- A.Account Planning
- B.Account Qualification
- C.Business Requirements Development
- D.High-Level Design Development
- E.Technology Strategy Development

Correct:A

10.What is the correct order for performing the activities in the Change Management service component?

- A.Originate, Schedule, Execute, Evaluate, Access, Communicate, Close
- B.Evaluate, Originate, Schedule, Execute, Access, Communicate, Close
- C.Evaluate, Communicate, Accept, Schedule and Execute, Originate, Close
- D.Originate, Evaluate, Accept and Schedule, Execute, Communicate, Close

Correct:D
