Exam : E20-005

**Title : Backup Recovery Systems
and Architecture Exam**

Version : Demo

1.Which statement defines retention period?

- A. Amount of time available for restoring a particular version of a backup dataset
- B. Amount of time available for overwriting a volume containing backups
- C. Period of time in which a backup must be restored
- D. Amount of time allocated for full system recovery

Answer: A

2.Which type of backup only copies the files that have changed since the last full backup?

- A. Cumulative
- B. Full
- C. Incremental
- D. Synthetic full

Answer: A

3.Which type of backup should be used to create a backup copy offline without disrupting I/O operations on a production volume?

- A. Cumulative backup
- B. Incremental backup
- C. Full backup
- D. Synthetic full backup

Answer: D

4.What is the interval of time between the creation and expiration of the backup called?

- A. Retention period
- B. Recovery point objective (RPO)
- C. Recovery time objective (RTO)
- D. Backup window

Answer: A

5.What is the primary reason for having disaster recovery backups?

- A. To restore data from an alternate site due to data loss at a primary site
- B. To restore data when data loss or logical corruptions occur during routine processing
- C. To restore data that was archived for regulatory compliance
- D. To restore data when data loss occurs due to minor hardware component failures

Answer: A
