

IT-DUMPS Q&A

Accurate study guides, High passing rate!
IT-dumps provides update free of charge in one year!

Exam : HC-224-ENU

**Title : Huawei Certified Datacom
Professional - Fast
Certification - ENU**

Version : DEMO

1.What is the maximum bits of a Class C address can be used for subnet?

- A.6
- B.8
- C.12
- D.14

Answer: A

2.In OSPF, which of the following statements are incorrect regarding Router LSA generated by Router A.?

- A. In Point-to-Point link type, Data is set to the interface IP address of RouterA.
- B. In TransNet link type, Data is set to the interface IP address of RouterA.
- C. In StubNet link type, Data is set to the interface IP address of RouterA.
- D. In Virtual link type, Data is set to the Router ID of RouterA.

Answer: CD

3.Which of the attributes must exist in the BGP Update messages ?

- A. LOCAL_PREF
- B. NEXT_HOP
- C. ORIGIN
- D. AS PATH

Answer: BCD

4.TRUE/FALSE: A device can be assigned an IP address 192.168.13.175, with the mask being 255. 255. 255. 240.

- A. True
- B. False

Answer: B

5.Besides an IPv4 address, a router distinguisher (RD) also contains a flag that distinguishes IP routes to the same destination IP address in different VPNs.

How many bits are there in the flag?

- A. 16
- B. 32
- C. 64
- D. 128

Answer: C

6.Which statements about OSPF packets are true?

- A. Hello packets can be sent after OSPF is enabled on an interface.
- B. LS Request packets are sent only after an adjacency is established.
- C. LS Update packets contain detailed LSA information for LSDB synchronization.
- D. LS Update packets are sent only after an adjacency is established.

Answer: ABC

7.TRUE/FALSE: Only Router-LSAs and Network-LSAs are involved in intra-area route calculations.

- A. True
- B. False

Answer: A

8.TRUE/FALSE: Only one BGP process can be configured on a router.

- A. True
- B. False

Answer: A

9.What is the function of the peer ignore command?

- A. Deletes a BGP peer.
- B. Retains all configurations of the peer, and maintains the BGP peer relationship with the peer, but does not receive the routes sent from the peer.
- C. Retains all configurations of the peer, and maintains the BGP peer relationship with the peer, but does not advertise routes to the peer.
- D. Retains all configurations of the peer, interrupts the BGP peer relationship with the peer, and clears all related routing information.

Answer: D

10.A Notification message with Error Code 2 indicates an error OPEN message.

Which of the following error sub-codes can be contained in this OPEN message?

- A. 1: indicates that the version number is not supported.
- B. 2: indicates that the AS of the peer is incorrect.
- C. 3: indicates that the BGP identifier is incorrect.
- D. 4: indicates that the Optional Parameters filed is not supported.

Answer: ABCD

11.Which following BGP attribute can used to define a set of prefixes with the same characteristics?

- A. Origin
- B. Nexthop
- C. Community
- D. MED

Answer: C

12.TRUE/FALSE: An IP-prefix-filter is used to filter IP prefixes and data packets.

- A. True
- B. False

Answer: B

13.Which of the following character strings matches the regular expression 100\$?

- A. 3100
- B. 100
- C. 1008
- D. 100 200

Answer: B

14.Which of the following as-path attributes match this AS-path-filter?

ip AS-path-filter 1 permit 100\$|400\$

- A. 100
- B. 3100
- C. 1234 1400
- D. 300 400

Answer: ABCD

15.In IPv4, which of the following is the SSM address range allocated by the IANA?

- A. 232. 0. 0. 0/24
- B. 225. 0. 0. 0/8
- C. 232. 0. 0. 0/8
- D. 239. 0. 0. 0/8

Answer: D

16.Which of the following configurations can be performed to implement fast failure detection on a network?

- A. Reduce the holdtime of Join/Prune messages.
- B. Reduce the interval for an interface to send Hello messages.
- C. Set up a PIM BFD session between network segment neighbors.
- D. Reduce the interval for sending Join/Prune messages.

Answer: BC

17.Which of the following technologies can reduce the scale of broadcast domain?

- A. VLAN
- B. Trunk
- C. RARP
- D. STP

Answer: A

18.Which are the functions of the route target on an MPLS VPN network?

- A. Enable the peer PE to determine whichVPNv4 routes can be imported to the specified VRF.
- B. Enable the peer PE to determine whichVPNv4 routes cannot be imported to the specified VRF.
- C. Enable the peer CE to determine whichVPNv4 routes can be imported to the specified VRF.
- D. Enable the peer CE to determine whichVPNv4 routes cannot be imported to the specified VRF.

Answer: AB

19.Which statement about the trunk interface is true?

- A. A trunk interface is always connected to hosts.
- B. Multiple VLAN IDs can be set on a trunk interface. The VLAN IDs can be the same as or different from the PVID.
- C. The trunk interface cannot have a PVID.

D. If the trunk interface receives a packet with a VLAN not in the allowed VLAN list, the trunk interface broadcast the packet in the VLAN.

Answer: B

20.Which of the following are factors that affect QoS?

- A. Bandwidth
- B. Delay
- C. Jitter
- D. Loss of packet

Answer: ABCD

21.IP network can provide various packet forwarding service, the service demands that users care during packet forwarding include .

- A. Throughput
- B. Delay
- C. Jitter
- D. Loss of packet

Answer: ABCD

22.IP QoS models include:

- A. Best-Effort
- B. Integrated Service
- C. Differentiated Service
- D. FIFO Service

Answer: ABC

23.QoS can provide different quality of service according to different demands, which of the following are functions of QoS?

- A. Providing private bandwidth for users
- B. Reducing loss of packet
- C. Congestion management and avoidance
- D. Specifying priority of packets

Answer: ABCD

24.What is the legal virtual MAC address in VRRP?

- A. 01-01-5E-00-01-01
- B. 01-00-5E-00-01-00
- C. 00-00-5E-00-01-01
- D. 01-01-5E-00-00-01

Answer: C

25.Which of the following statements are correct regarding Master in VRRP?

- A. The router with highest priority will become Master.
- B. The router with smallest priority will become Slave.

- C. The router with highest priority may not always be Master.
- D. The router with smallest priority may not always be Slave.

Answer: CD

26.Which of the following statements are correct regarding priority in VRRP?

- A. The IP address owner always uses 255 as its priority regardless its config priority.
- B. The IP address owner always uses 0 as its priority regardless its config priority.
- C. We can configure the priority as 0 to make the router never attend the Master election.
- D. If a VRRP router changes from Master to Slave, it will send out a VRRP message with priority 0 in the network.

Answer: A

27.Which of the following statements are correct regarding VRRP?

- A. Only Master can process the data packets sending to virtual router.
- B. Only Slave can process the data packets sending to virtual router.
- C. Both Master and Slave can process the data packets sending to the same virtual router to realize load balance.
- D. By default, only Master can process the data packets sending to virtual router; but we can do some configuration to make the Slave process the data packets sending to virtual router.

Answer: A

28.Which of the following statements are correct regarding the function of VRRP?

- A. VRRP can improve the reliability of default gateway.
- B. VRRP increase the convergence speed of routing protocol.
- C. VRRP is mainly used for traffic balance.
- D. VRRP can provide one default gateway for different network segments, it simplifies the gateway configuration for PC.

Answer: A

29.Which of the following statements are correct regarding default gateway in the network running VRRP?

- A. Configure only one gateway for the PC which is the IP address of Master.
- B. Configure only one gateway for the PC which is the IP address of virtual router.
- C. Configure two gateways for the PC which are the IP addresses of Master slave.
- D. Configure three gateways for the PC which are the IP addresses of Master, and virtual router.

Answer: B

30.Which of the following authentication modes does VRRP use?

- A. No authentication
- B. Simple text password
- C. MD5
- D. CHAP

Answer: ABC
