IT-DUMPS Q&A

Accurate study guides, High passing rate!
IT-dumps provides update free of charge in one year!

Exam : **HP0-763**

Title : NonStop Kemel Systems Management and Operations

Version : DEMO

1.What is an indicator of a poorly performing system?

A.page-faults of 0.01 per second

B.processor imbalance of 5 %

C.queue-length of 10

D.transaction rate of 10 transactions per second

Correct:C

2.What is the objective of capacity planning?

A.To justify the return on investment and determine user community satisfaction.

B.To ensure the system is fully utilized and there is no resource contention.

C.To ensure that the system is well balanced and meeting the service level agreement.

D.To determine if or when additional capacity is needed to meet the SLA.

Correct:D

3.Which NonStop Himalaya S-series NonStop Kernel tool is used to perform capacity planning?

A.TPM

B.TPDC

C.TCM

D.GPA

Correct:C

4.What are the benefits of running a program in native mode? Select TWO

A.allows TNS and native code to be combined

B.allows to run as high-PIN

C.object file size is significantly larger

D.larger stack space is supported

E.runs faster than TNS and accelerated code

Correct:D E

5.Which utility is used to determine the current number of index levels in a key-sequenced file?

A.NSX

B.PEEK

C.FUP

D.TCM

Correct:C

6.Which SCF command will save the current disk configuration to a file named CONF0102?

A.SAVE CONFIGURATION CONF0102

B.SAVE CONFIGURATION 1.2

C.SAVE DISK, FILE CONF0102

D.OBEY FORM /OUT CONF0102/ DISK

Correct:B

7.Which tool is used to revert to a previously saved system configuration database?

A.DSM/SCM

B.SQLCI

C.TSM

D.SCF

Correct:C

8.Which facility is used to forward events from the primary collector ($0) to the TSM console?

A.EMS alternate collector

B.compatibility distributor

C.EMS trap subagent

D.TSM service application

Correct:B

9.Which DSM facility provides event collection, logging, and distribution facilities?

A.TM/MP

B.EMS

C.SQL

D.DSM/SCM

Correct:B

10.Burst detection and suppression is used to

A.limit network bandwidth use

B.delete rapid and repetitive events

C.minimize voltage fluctuations

D.control the growth of SQL tables

Correct:B

11.Processor lock-step processing, mirrored disks, and TM/MP support which key feature of the NonStop Himalaya server?

A.data integrity

B.linear expandability

C.manageability

D.security

Correct:A

12.How do EMS filter tables simplify the writing of filters?

A.They can be used with both collectors and distributors.

B.They are text files that do not require compilation.

C.They cannot be modified dynamically.

D.They allow specification of individual token values.

Correct:B

13.What is the maximum number of lines a SWAN concentrator can support?

A.6

B.8

C.16

D.32

Correct:A

14.Which facility automatically delivers customized support information?

A.IPM scout

B.Express Notice

C.Compaq TWS

D.Integrity scout

Correct:B

15.What is NOT a reason for audit-trail files to be pinned on an audit-trail volume?

A.might be needed to restart TMF

B.might be needed to recover datavolume

C.might be needed to stop and start RDF updaters

D.current file

Correct:C

16.You encounter the message "STATUS - * 1077 * PATHMON, TAKEOVER BY BACKUP" on a PATHWAY subsystem. What is the recommended action?

A.Switch the PATHMON back to the configured primary processor and see if the failure occurs again.

B.Check if there has been a process or processor failure or an operator has issued a command to switch the primary process.

C.Ignore the message because the backup process is still running and no application outage has occurred.

D.Perform a processor dump and provide a copy of the EMS log and PATHWAY PATHCTL file to your support service provider.

Correct:B

17.Which command monitors system and application Event Management Service (EMS) messages?

A.STATUS prog *, cpu *, out $home, detail on

B.EMSDIST type p, collector $0, textout $home

C.EMSVIEW in $0, out $term, time all ,detail on

D.SYSLOG emslog *, outdev $term, type f, status *

Correct:B

18.Which TSM application sets the VADS (Value Added Diagnostics) password?

A.low level link

B.notification director

C.SP tool

D.service connection

Correct:B

19.Which command allows the implementation of a TM/MP software IPM into a running TM/MP configuration?

A.ALTER TMF

B.ALTER PROCESS

C.ALTER DATAVOL

D.ALTER AUDITTRAIL

Correct:B

20.Which tool is used to view TSM alarms?

A.SP Tool

B.low level link

C.service application

D.guided replacement toolkit

Correct:C
