Exam : **HPE7-A05**

Title : Aruba Certified Data Center Professional Exam

Version : DEMO

1.Which of the following is a commonly used protocol for securely transferring files over a network?

A. RDP

B. Telnet

C. SSH

D. FTP

Answer: C

Explanation:

SSH (Secure Shell) is a protocol used for secure file transfer and remote access.

2.What embedded diagnostic tool in Aruba Data Center helps to identify and resolve network security vulnerabilities?

A. Network Insight

B. ClearPass

C. RFProtect

D. Aruba Sensor

Answer: B

Explanation:

ClearPass is an embedded diagnostic tool in Aruba Data Center that helps to identify and resolve network security vulnerabilities.

3.Which of the following is a feature of VLANs that allows devices in the same VLAN to communicate with each other?

A. ARP

B. DHCP

C. Inter-VLAN routing

D. Subnetting

Answer: C

Explanation:

Inter-VLAN routing allows devices within the same VLAN to communicate with each other.

4.When maintaining and optimizing a data center solution, what is a common task that should be regularly performed to ensure optimal performance?

A. Changing the network topology

B. Powering off the equipment overnight

C. Checking for software updates

D. Ignoring performance reports

Answer: C

Explanation:

Regularly checking for software updates is crucial to maintain security and performance in a data center solution.

5.What is the purpose of regularly optimizing an Aruba data center solution?

A. To enhance security

B. To reduce costs

C. To increase scalability

D. To improve performance

Answer: D

Explanation:

Regular optimization helps to improve the performance of the data center solution, leading to better efficiency and user experience.
