3.A process with multiple parallel branches from a single path must converge into a single path. When the activities in one branch are completed and reach the point of convergence, control must be passed to the single path without waiting for the other branches to complete.

Which Workflow Control Pattern should be used to achieve this functionality?

- A. Structured Discriminator
- B. Cancelling Discriminator
- C. Structured Synchronizing Merge
- D. Multi-Merge

Answer: A

4. Click the Exhibit button.

The image shows a screenshot of the TIBCO Business Studio interface. The main window is titled 'Customer Name (CustName)'. On the left, there is a sidebar with 'General' and 'Rules' tabs. The 'General' tab is selected. The main area contains the following fields: 'Name' with the value 'CustName' and a 'Rename...' button; 'Label' with the value 'Customer Name'; 'Mode' with three radio buttons: 'In', 'Out', and 'In / Out' (which is selected); an 'Array' checkbox which is unchecked; 'Type' with a dropdown menu showing 'Text'; 'Length' with a text box containing '50'; and 'Decimal Places' with a text box containing 'NA'. At the bottom, there is a 'Bindings' section with two icons: a blue one and a green one.

Which two options are available when adding a binding to a form parameter in TIBCO Business Studio? (Choose two.)
